

ZIMMER+ROHDE

Product data sheet

With its looser weave, the translucent décor fabric PERGAMON allows warp and weft to unfold a unique dynamic. The front and reverse each consist of a transparent grid structure, connected at random interstices. This leads to a varied visual interplay of the two layers. The artistic dye effects are attained with individual craftsmanship for a lively color effect. The sum of all these appealing and finely balanced design effects makes PERGAMON a genuine piece of woven poetry.
